

PUZZLE ADVENTURE

Knight Gino

Princess Albicocca

Evil Rocco

*Hi! I'm **Knight Gino**, the hero of Puzzle Adventure! Our mission is to save **Princess Albicocca**, who was kidnapped from **Evil Rocco** and imprisoned in his castle. To reach the castle we have to win all the 50 minigames's crowns, through 10 different zones. On the map there are two kinds of spots: the red ones represent the stages (when you are on it you can see the name of the zone and how much crowns there are in it) and the blue ones represent the saving zones (they show you how many crowns you have). You can choose them by pressing the **ENTER** button. In each stage there are some icons that represent the minigames and you can play them with a left button's click: if you clear a minigame you win a crown, otherwise you lose a heart. To complete a zone you have to play all the minigames without losing all the hearts, this way will appear a yellow arrow that will allow you to return to the map by a left button's click.*

*Before starting I want to tell you another thing: if you want to quit the game you have to press **ESC** button, in this way you can return to title screen and from here you can choose: **NEW GAME** to start a new adventure, **LOAD GAME** to resume a saved game or **EXIT GAME** if you want to join me in the adventure next time.*

ENJOY PLAYING!!!
