

# Plextool Guideline & Change History

	Guideline
1	PLEXTOOL is designed exclusively for Plextor SSDs. If you use SSDs of other brands, you may not get complete information by PLEXTOOL.
2	Please create partition(s) for your SSDs before executing PLEXTOOL, or your PLEXTOOL can not work smoothly.
3	<p>Sometimes security frozen lock might be enabled by BIOS, so that you had better to re-plug your drive before executing secure format.</p> <p>Once your Plextor SSD is an external drive, secure format can only be executed through a SATA-USB adapter which supports ATA/ATAPI Packet Command Set and ATA/ATAPI LBA48 addressing mode.</p> <p>If not, your PLEXTOOL might not be able to work smoothly. Please do follow the popping-out instructions during the process to make sure you execute this function successfully.</p>
4	PLEXTOOL can only support Plextor M2P 、M3 、M3P 、M5S 、M5P(ro) 、M6S 、M6M and afterwards. Before start PLEXTOOL, please remember to upgrade FW to latest version.

version	Change History
Plextool v1.0.7	<p>Compared to previous versions, Plextool v1.0.7 brings our valued users some additional features as below:</p> <ul style="list-style-type: none"> <li>(a)Multi-languages according to OS.</li> <li>(b)Simple read/write scan</li> <li>(c)Auto detecting &amp; alarm of new FW update</li> <li>(d)S.M.A.R.T. information sharing</li> <li>(e)Monitoring drive status during a background process</li> </ul>
Plextool v1.0.8	<p>Compared to previous versions, Plextool v1.0.8 fixed bugs as below:</p> <ul style="list-style-type: none"> <li>(a)Multi-language display issue</li> <li>(b)USB cannot detect SSD after hot-plug, and has to reinstall PC or NB</li> </ul>
Plextool v1.0.9	<p>Compared to previous versions, Plextool v1.0.9 fixed bugs as below:</p> <ul style="list-style-type: none"> <li>(a) Support Intel AHCI driver 12.6</li> <li>(b) Fixed multi-language resource file error in some languages due to edit it in Simplified Chinese platforms.</li> </ul>
Plextool v1.1.0	<p>Compared to previous versions, Plextool v1.1.0 fixed bugs as below:</p> <ul style="list-style-type: none"> <li>(a)Ninja model cannot work normally.</li> </ul>
Plextool v1.1.1	<p>Compared to previous versions, Plextool v1.1.1 fixed bugs as below:</p> <ul style="list-style-type: none"> <li>(a)Fixed: M5M+ didn't support Plextool.</li> </ul>
Plextool v1.1.4	<p>Compared to previous versions, Plextool v1.1.4 improves as below:</p> <ul style="list-style-type: none"> <li>(a) M6S,M6M,M6e are now supported by plextool.</li> </ul> <p>※ Before using Plextool under win8 &amp; win8.1, please make sure your IRST be updated to 12.8.0 or the above version.</p>

Plextool v1.1.5	<p>Compared to previous versions, Plextool v1.1.5 improves as below:</p> <ul style="list-style-type: none"> <li>(a) New user interface and function has been applied.</li> <li>(b) Utilized accelerating function for upcoming new series of SSDs has been added.</li> <li>(c) FW updater has been utilized and strengthened.</li> </ul>
Plextool v1.1.6	<p>Compared to previous versions, Plextool v1.1.6 improves as below:</p> <ul style="list-style-type: none"> <li>(a) PlexTurbo has been upgraded to revision 2.0. 3 features are available. <ul style="list-style-type: none"> <li>i. Performance Boost.</li> <li>ii. Safe Power Loss</li> <li>iii. Life Extension Mechanism</li> </ul> </li> <li>(b) PCIe link status can now be displayed.</li> <li>(c) M6Pro and PCIe SSD series now supported by PlexTurbo.</li> </ul> <p>※Support List of PlexTurbo Function:  PX-G128/256/512M6e,  PX-AG128/256/512M6e,  PX-128/256/512M6Pro / PX-1TM6Pro.</p>
Plextool v1.1.7	<p>Compared to previous versions, Plextool v1.1.7 improves as below:</p> <ul style="list-style-type: none"> <li>(a) Upgrade PlexTurbo Utility to revision 2.1 to fix compatibility issue on some motherboard.</li> </ul>
Plextool v1.1.8	<p>Compared to previous versions, Plextool v1.1.8 improves as below:</p> <ul style="list-style-type: none"> <li>(a) Add the description of “ PCIe SSD not supported” SECURE FORMAT function.</li> <li>(b) New M6V SSD series now supported by PlexTurbo.</li> </ul>
Plextool v1.2.0	<p>Compared to previous versions, Plextool v1.2.0 improves as below:</p> <ul style="list-style-type: none"> <li>(a) M7VC, M7VG are now supported by Plextool.</li> </ul>

Plextool v1.2.2	<p>Compared to previous versions, Plextool v1.2.2 improves as below:</p> <ul style="list-style-type: none"><li>(a) M6M, M7VS, M5S , M5Pro are now supported by Plextool.</li><li>(b) Fix some display message while drive is connected with USB interface .</li></ul>
