

Directory List & Print Pro

© by Infonautics GmbH, Switzerland

Directory List & Print is a software tool for Windows™ and enables listing and printing the content of any directory in a simplest way. By copying to the clipboard the lists can be exported into other programs or opened directly in Word™ and Excel™.

The Free Version (Freeware) has all the basic features included, the Pro Version (Shareware) provides interesting additional features.

Installation

This program does not have to be explicitly installed (portable application). Copy the two files „DirectoryListPrintPro.exe“ and „DirectoryListPrintPro.pdf“ into a directory and start the program „DirectoryListPrintPro.exe“ or the corresponding manual „DirectoryListPrintPro.pdf“ whenever necessary.

Pro-Licence

Some of the features in the Pro Version are not free and set inactive in the freeware version. They can be activated online for a small fee at:

<http://www.infonautics.ch/directorylistprint/buy>

The Pro licence is valid for an unlimited time and all future updates.

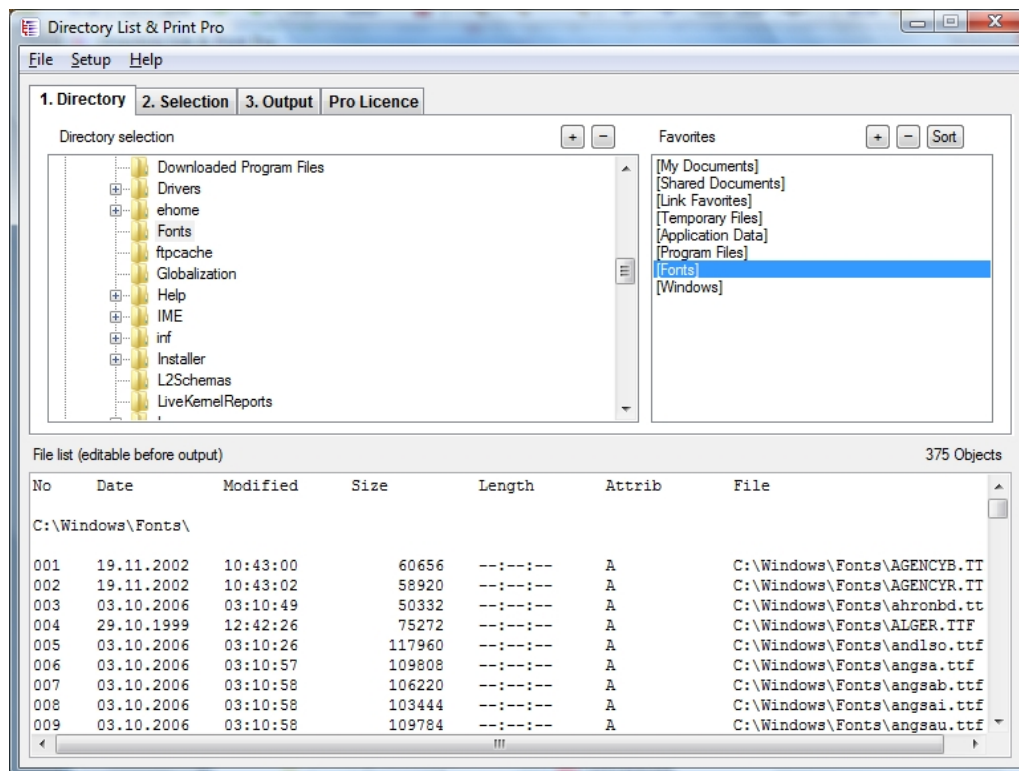

System Requirements

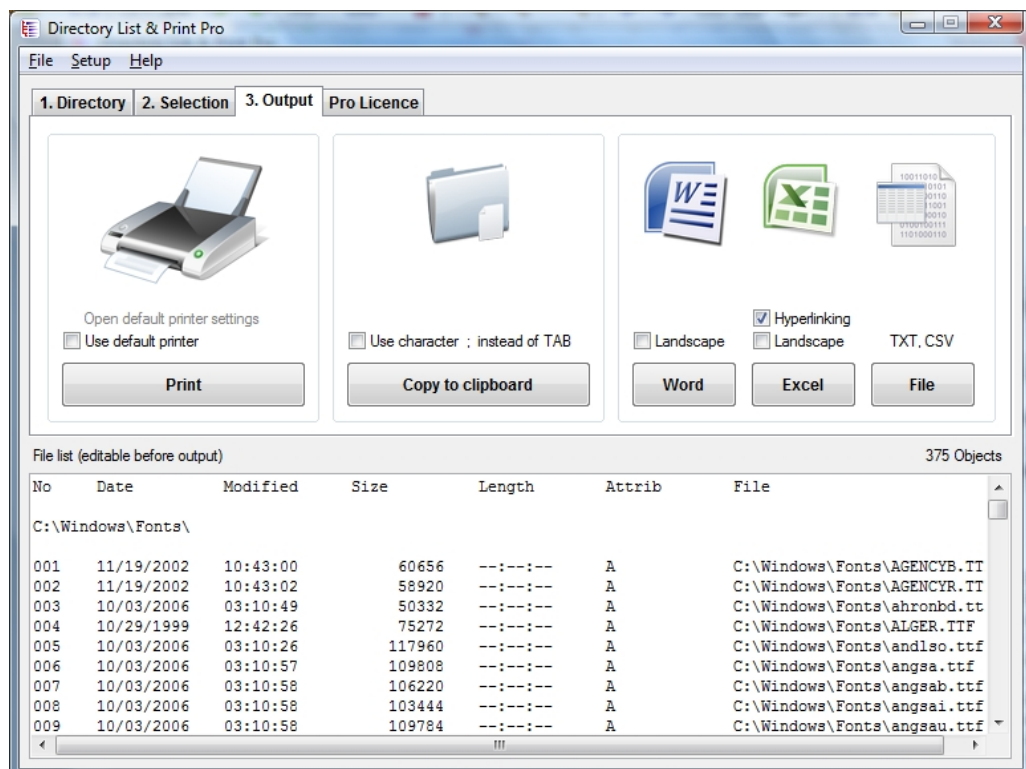

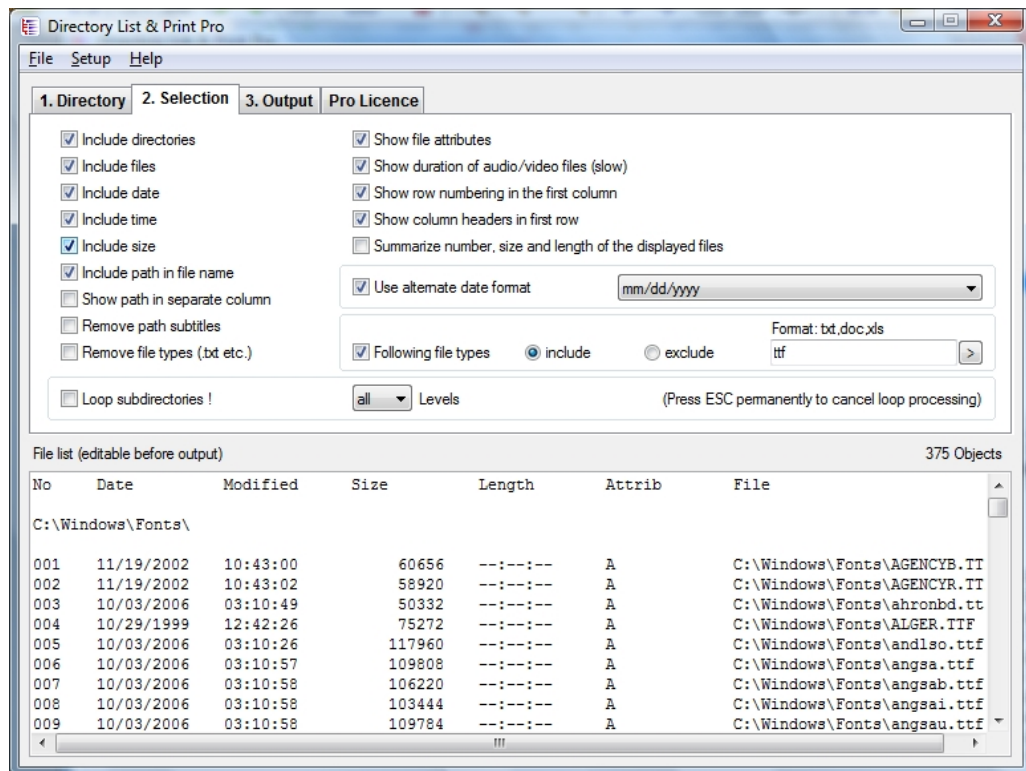

Microsoft Windows™ XP/Vista/7.
Program space on hard disk: about 3 MB.

Screenshots

The program supports the creation of the directory listings in 3 steps:

1. **Directory** selection
2. **Selection** of requested details
3. **Output** of the file list

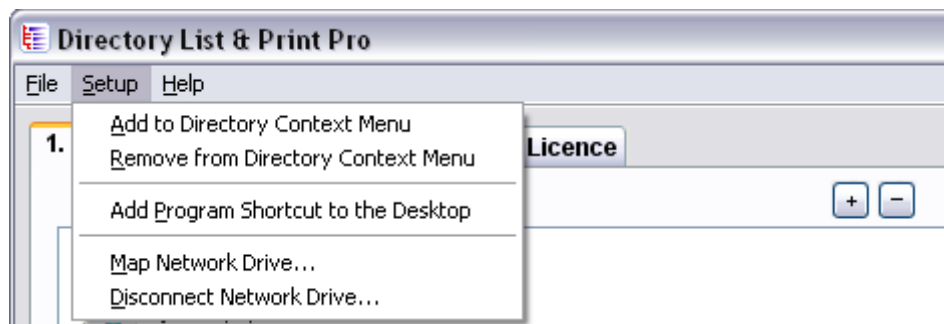

Features

Freeware and Pro Version

- Selection of directories to be listed by a tree structure.
- Direct selection of important system directories as „My Documents“ (favorites).
- Listing of sub-directories and/or files with recursive sub-directory listing.
- Display of last modification date.
- Display of last modification time.
- Display of file size.
- Display of file name with or without directory path.
- Display of file names with or without file extensions.
- Indication of number of entries of files and directories in the list.
- Direct printing of the corresponding list.
- Export list into other programs by copying to the clipboard. The corresponding data will be organized in columns and separated by tabs so that the list can be pasted directly into other programs.
- Open the list directly in Microsoft Word™ and Excel™.
- Automatic saving of display options when exiting the program.
- Start program with a directory path as a parameter to show directly that directory:
“C:\Program Files\DirectoryListPrint.exe” “%1”
- Integration of "Directory List & Print" in the context menu of directories to open any directory directly from within Windows Explorer with "Open in Directory List & Print".
- Automatic set up of a program shortcut on the desktop.
- Support for connecting and disconnecting network drives.

Pro Version only

- Save own directory favorites.

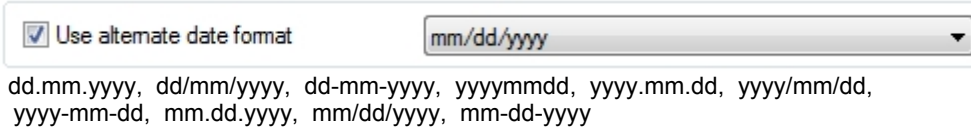

- Set directory recursion depth for subdirectories.

- Display of file attributes such as Read Only, Hidden, System, etc.
- Indication of the duration of audio and video files.
- Display of a continuous numbering of the objects.
- Display of column titles in the first row.
- Show number and sum of size and length of the displayed objects.

- Display of the date in many different international formats.

- Set filter to include or exclude certain file types.

- Output the list directly to the default printer.
- Output the list in comma- or tab-delimited file or CSV file.
- Linking of files and directories in Excel TM for direct open by mouse click.
