DarkAdapted Pro

DarkAdapted Pro is only available on the Macintosh. This is because many of DarkAdapted Pro's advanced features are not supported by the Windows system environment, over which we have no control.

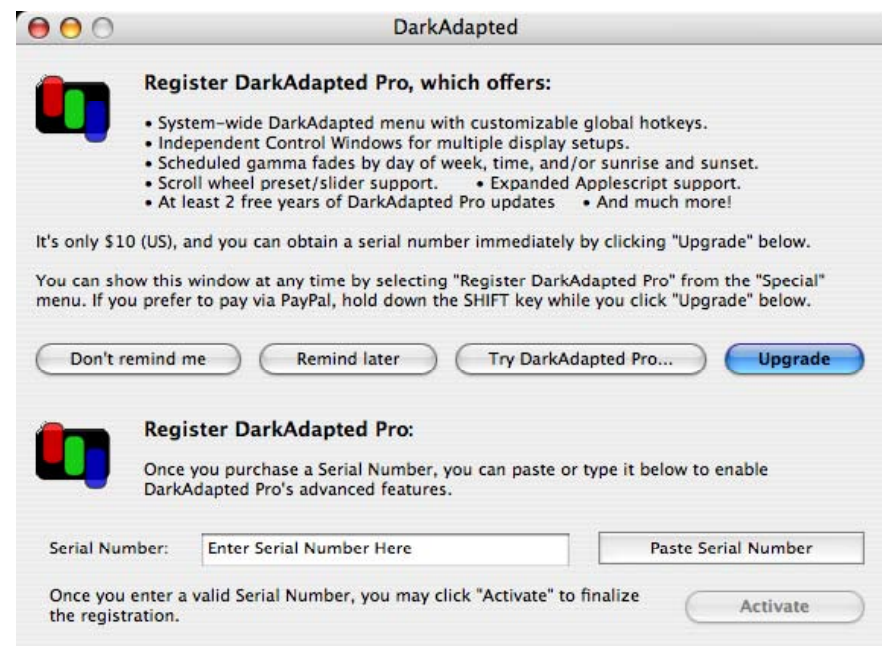

You may try DarkAdapted Pro at any time by selecting [Try DarkAdapted Pro...](#) from the **Special** menu. DarkAdapted will then operate in Pro mode for 10 minutes at a time. You may select [Try DarkAdapted Pro](#) as often as you wish.

DarkAdapted opens in “Standard” mode, which controls all displays in unison, does not support the mouse scroll wheel, and cannot utilize scheduled events.

Once DarkAdapted has been launched a few times, or operated for more than ten minutes, one of the following windows will appear.

On Mac OS X, the following window appears:
